

WINDOW OPTIONS

Channel & Standard
Channel in 3/4" & 3/4"

2 1/4" Brickmould

4" Brickmould

EXTERIOR BRICKMOULD (WITH NAIL FIN)

Exterior brickmould finishes your exterior beautifully and offers easy installation with an outer flange with predrilled holes.

A channel brickmould is also available for use with siding, creating a clean finished look.

2" RENOVATION BRICKMOULD

Renovations are made easier with exterior brickmould which conseals installation screws and lets you install windows without having to remove exterior finishes.

2" Renovation

Canyon Clay Sandalwood Sandstone Slate Bronze Black Chestnut Brown

COLOUR OPTIONS

Colour options available for exterior of the window or brickmould. Both are painted in-house with a non-toxic eco-friendly paint. Colour matching available. Actual colour may vary from images.

INTERIOR DRYWALL RETURNS

Armwood U-channel returns are available in 1/2" and 3/4". Finish your interior window with the slick return of drywall back to the window.

PVC JAMB EXTENSIONS

Armwood Windows & Doors offer jamb extensions that make installation easy. These durable extensions can be ordered in standard or custom widths. Custom composite jambs available upon request.

ENERGY SAVING FEATURES

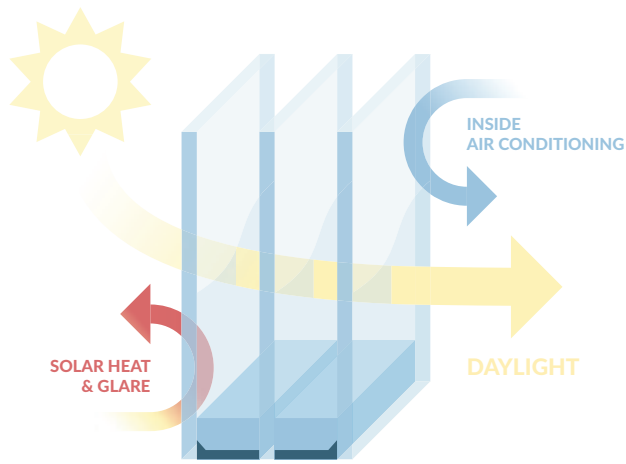

STANDARD FEATURES

Silicone 3 seal spacers perform better than metal spacers, and are standard features on all Armwood windows. These spacers are non conductive with a rate 25 times lower than traditional metal spacers. This results in reduced condensation and increased life of your insulated glass unit.

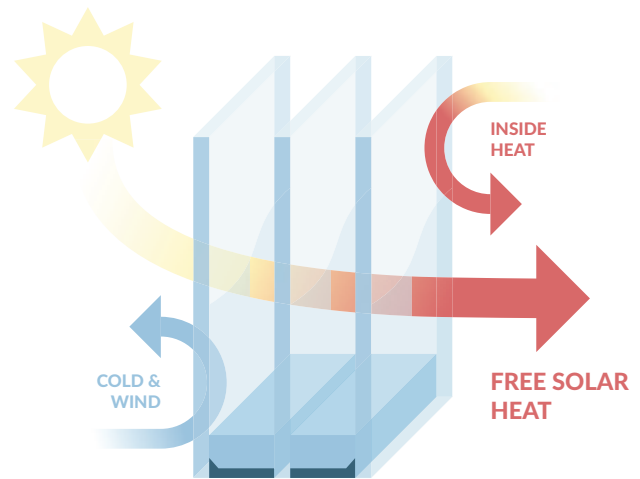

Glass is one of the most integral products in your home. It is critical for maximizing energy efficiency, comfort and security. Armwood windows meet and exceed all climate conditions; in hot and cold weather.

SOLAR CONTROL

Solar Control allows sunlight to pass through while radiating and reflecting away a large degree of the sun's heat. The indoor space stays bright and much cooler.

PASSIVE SOLAR

Passive solar windows collect, store, and distribute solar energy in the form of heat in the winter and reject solar heat in the summer.

OUR WINDOWS OFFER:

- Outstanding heat blocking
- Excellent UV blocking
- Unparalleled colour neutrality
- Superior insulated glass R-Value
- Condensation reduction

Low-E glass is energy-saving, high efficiency class that locks the passage of heat energy. It keeps your rooms warmer in the winter and cooler in the summer.

Low-E windows also block most solar heat gain while transmitting most visible light. Windows with Low-E glass maintain little heat both in and out.

Argon Gas

Together with Low-E glass, adding argon gas is like adding another layer of insulation to your wall, greatly increasing your energy efficiency. Argon gas is non-toxic, inert, clear and odorless.
